

ALMAC

Partnering to Advance Human Health

Brexit - a seamless solution

Timely assurance to you, our client, in relation to Brexit negotiations

- New custom-built European campus
- Located in Dundalk, Ireland
- Just 40 mins from our global HQ facility
- Seamless access to EU marketplace
- Uninterrupted service provision
- Continue to meet all EU requirements

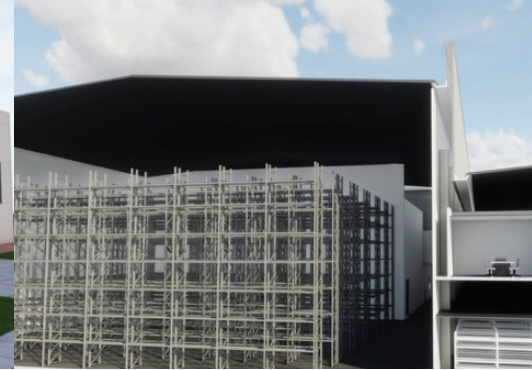

Processing facility

QC laboratory

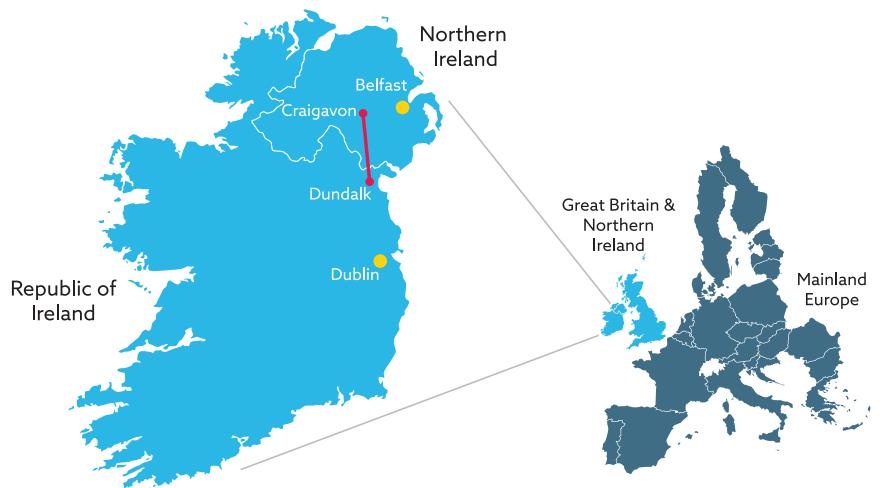

EU Distribution Centre

Almac's European campus

Our new European campus places Almac in a unique position as Northern Ireland will be the only part of the UK to have a land border with the EU. In addition, it enables the continued use of Dublin airport as a European gateway.

The HPR (Health Products Regulatory Authority (Ireland)) approved site enables Almac to conduct QP batch certification and release for both clinical trial material and commercial drug product directly from the EU.

Ongoing investment in this custom-built campus will expand our presence within the EU by establishing:

- A processing facility to provide a range of commercial drug product services including:
 - Secondary packaging
 - Walleting
 - Blister overprinting
 - Complex kit assembly
 - Labelling
 - Serialisation
- State-of-the-art QC laboratory to perform commercial release testing and other support analysis of all dosage forms
- Significant 15-25°C, 2-8 °C and frozen storage solutions
- Commercial distribution and 3PL direct to pharmacy services

BREXIT NOTES: Brexit refers to the planned withdrawal of the United Kingdom from the European Union. The UK will leave the EU at 11pm (GMT) on Friday 29 Mar 2019. To ease the withdrawal process, there is a proposed transition period (29 Mar 2019 - 31 Dec 2020). Negotiations continue between the UK and the EU on matters including quality & regulatory processes and rules & tariffs on import & export.
